

## User manual - KrogkollenAdmin

### Installation:

To install the application you need to download the .apk file from our dropbox on the following link:

<https://db.tt/eVA0UwoY>

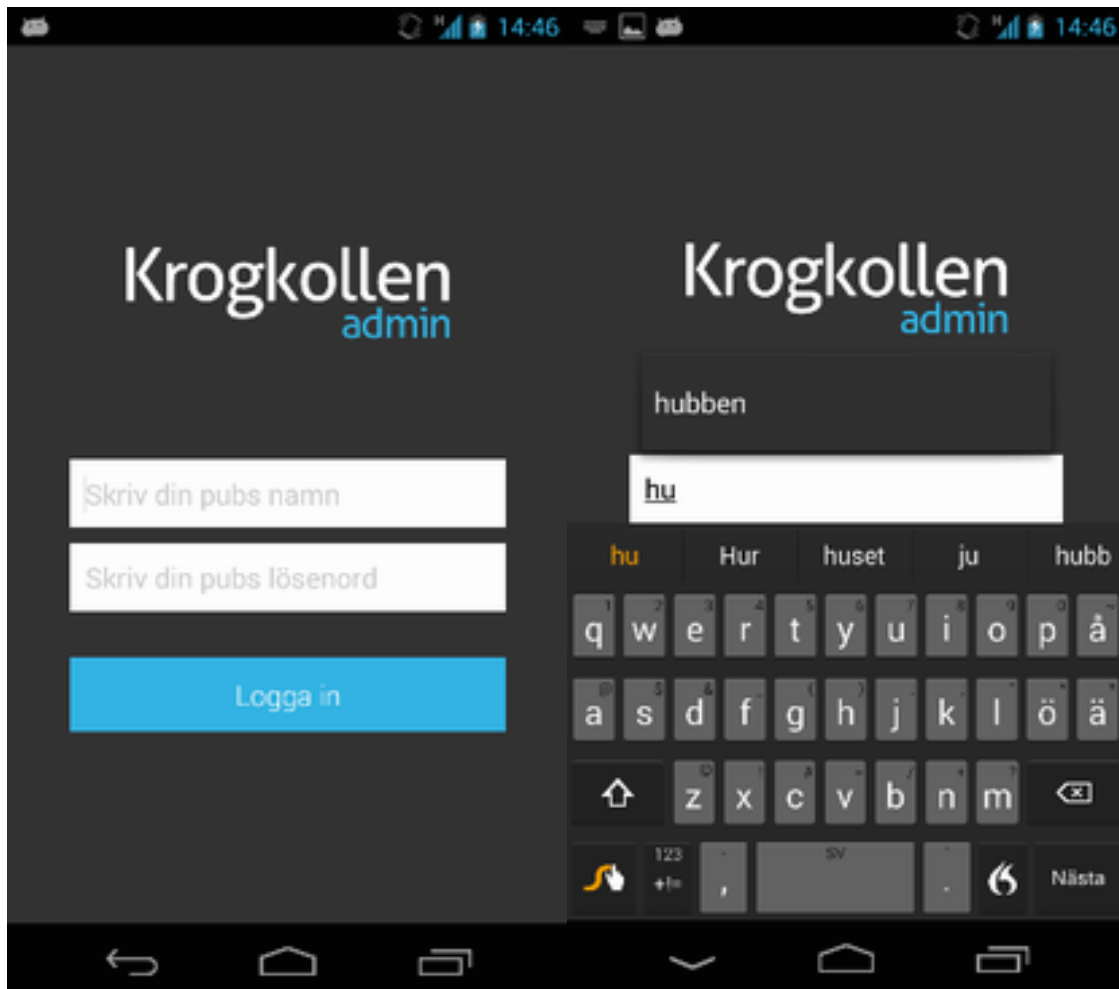

After the download has finished you install it by clicking on the file and accepting the terms of usage. To do this you need to have checked the option “Unknown sources” in the security section in Settings.

*Unknown sources option marked out in red.*

**Usage:**

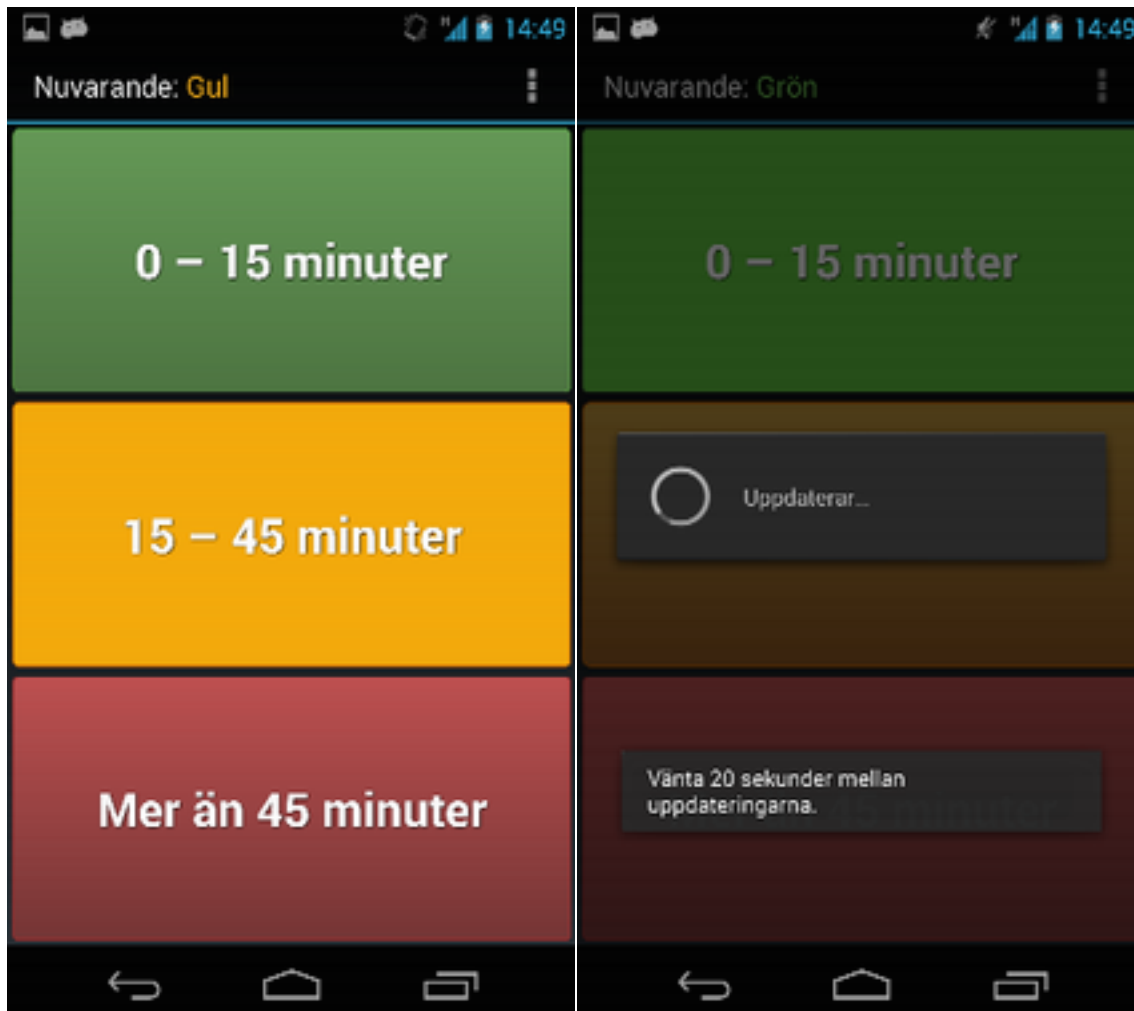

The first view you will get to when you start the app is the login screen. Here you will see two fields, one for the login name for your pub, and the other one for the password. From here you can click the blue button to log in if you entered the right username and password.

*The login screen*

*Autocompletion on the field for username.*

When you log in you will get to this view. Here you will be able to update the queue time for your pub. Simply click the button which corresponds to your choice. The users of Krogkollen will now see this as the current queue time for your pub. If you want to turn off notifications, you can click the icon in the top right corner and then uncheck the checkbox, or if your phone has a physical “menu” button, you can click this to access this menu. If you want to log out you simply click log out, which can be found next to the checkbox for the notifications.

*The main feature of the admin app.*

*You will see this when you update.*
